

## CDMO Expertise Production

### VGXI: Your Trusted CDMO Partner to Power Your Next Breakthrough

VGXI is a leading-edge global CDMO dedicated to revolutionizing the biopharmaceutical industry with top-tier nucleic acid-based products and services. For over two decades, VGXI has been a key player in the biopharmaceutical industry, driven by an unwavering commitment to quality.

When you choose VGXI as your CDMO partner, you entrust your manufacturing needs to a dedicated ally, one that is equally committed to your core mission: bringing life-changing treatments to patients worldwide. Outsourcing to a trusted partner brings a host of advantages, including specialized expertise, stringent quality assurance, cost efficiency, and scalability to drive your therapeutic innovations forward.

**State-of-the-Art Facilities and Technology:** VGXI's world-class facilities feature leading-edge technology platforms, ensuring manufacturing excellence designed for future needs.

**Dedication to Quality:** Our vertically integrated systems, operational redundancies, and established quality systems guarantee the highest product quality and regulatory compliance.

**Expert Team:** Clients benefit from superior results and flexible solutions driven by our dedicated team of experts, providing support from development through commercialization for complex, next-generation therapeutics with speed, precision, and expertise.

**Customizable Solutions:** We are committed to delivering phase-appropriate and customizable solutions at every scale and timeline to meet our clients' needs regardless of their development phase or project scope.

VGXI has extensive experience and a successful history with global regulatory agencies, including the Food and Drug Administration (FDA), Health Canada, and the European Medicines Agency (EMA). As of January 2024, VGXI has been approved by the client for use for each of these audits since 2012.

Together, we can change lives, one breakthrough at a time.

## About VGXI

Backed by two decades of production and regulatory expertise, VGXI is the ideal CDMO partner to support every step of your product pipeline from early development to market launch. Our dedicated team and state-of-the-art facilities ensure that your experience with VGXI exceeds expectations with unrivaled scale, reliability, and excellence. VGXI doesn't just meet today's demands, we're future-proofing demand for tomorrow's innovations and setting new industry benchmarks with the world's largest plasmid DNA manufacturing capacity.
